OUR NO FAIL TRADITIONAL ROASTED TURKEY

FIRST STEP: SEASON YOUR TURKEY

ROASTING TIMES IN A PREHEATED 350 DEGREE CONVENTIONAL OVEN:

10-18 pounds: 3 – 3 ½ hours

18-22 pounds: 3 ½ - 4 hours

22-24 pounds: 4 – 4 ½ hours

Cook the turkey until the skin is a light golden brown and then cover loosely with a foil tent. During the last 45 minutes of baking, remove the foil tent to brown the skin. Basting is not necessary, but will promote even browning.

The only true test to ensure your turkey is fully cooked is the temperature of the meat. When the thigh meat reaches an internal temperature of 165 degrees, the turkey is done. Ensure that when taking its temperature, the thermometer is not touching the bone.

When the turkey is done, remove from the oven and allow to stand for approximately 20-30 minutes before carving.

CARVING YOUR TURKEY

1. Turn the turkey so that the ends of the legs are facing you and the wings away from you.
2. Using a carving fork & knife, begin with the right drumstick. Steady the turkey with the fork and cut the skin between the thigh and the breast.
3. Using your knife to help you, cut the thigh away from the bird to find the hip. Slice through the joint and remove the leg with the thigh attached.
4. Holding the drumstick with your fork, cut between the drumstick and the thigh bone to separate the thigh from the leg.
5. Carve the meat from the leg and thigh if desired and add to your serving platter.
6. Find the right wing joint and slice through it to remove the right wing. Add to your serving platter.
7. Using your fork to hold the turkey, begin to slice thin pieces from the entire length of the right side of the breast, working parallel to the center breastbone, slicing from the outside inwards. When completed, repeat on the opposite breast.
